New York Relative Maximum score: **63.75**  
Date NY assessment approved: 10-08-2008 revised 01-17-2013

New York State Invasive Rank: **Moderate** (for natural areas)

### SUMMARY OF PRISM RANKING RESULTS:

**Distribution:** Widespread  
**Estimated number of infested sites:** >10  
**PRISM Invasiveness Rank**: Moderate

### A. DISTRIBUTION AND ABUNDANCE (KNOWN/POTENTIAL):

1. What is the species distribution and abundance in the PRISM?
   - **A.** Not present  
     - Answer: Not Present
   - **B.** Occurs in three or fewer natural areas (locations that are at least ¼ mile apart) with no infested area* >1 acre or containing >100 individuals
     - **Answer:** Restricted
   - **C.** Present in 4–10 natural areas, or with one occupied location >1 acre or containing >100 individuals
     - **Answer:** Common
   - **D.** Present in >10 minimally managed areas
     - **Answer:** Widespread
   - **U.** Unknown
     - **Answer:** Unknown

---

**Describe distribution:**
Present in all counties in the LIISMA.

**Sources of information:**

---

§Not Assessable: not persistent in the PRISM, or not found outside of cultivation.
2. What is the likelihood the species will occur (if not yet present) or expand its distribution and abundance (if already present) in the PRISM?

Answer: **Very likely**

Documentation (e.g.: history of establishment in PRISM, suitability of habitats and climate, distribution models, literature, expert opinions):
- Already present in all counties in the LIISMA.

Sources of information:

B. INVASIVENESS RANK IN THE PRISM:

Is the species distribution Widespread or Common?

Yes: Go to column A in table below.

No: What is the likelihood of species occurrence or expansion? Answer: __________

- Very Likely: Use column A below
- Moderately likely: Use column B below
- Unlikely: Use column C below
- Zero likelihood Invasive potential Insignificant
- Unknown Invasive potential Unknown
- Not assessed Invasive potential not assessed

Assign a PRISM invasiveness rank to the species based on its New York Relative Maximum Score, using the designated column in the table below.

<table>
