PRISM
(New York Partnerships for Regional Invasive Species Management)
NON-NATIVE PLANT INVASIVENESS RANKING FORM

PRISM: Long Island Invasive Species Management Area

Scientific name: Hemerocallis fulva  USDA Plants Code: HEFU
Common names: Orange daylily
Native Distribution: Asia
Date Assessed: November 26, 2008
PRISM Assessors: Steve Glenn
PRISM Reviewers: LIISMA SRC
Date Approved: 02-11-2009  Form version date: 25 August 2008

New York Relative Maximum score: 46.25  Date NY assessment approved: 02-11-2009
New York State Invasive Rank: Low

SUMMARY OF PRISM RANKING RESULTS:
Distribution: Widespread
Estimated number of infested sites: 30+
PRISM Invasiveness Rank: Low

A. DISTRIBUTION AND ABUNDANCE (KNOWN/POTENTIAL):

1. What is the species distribution and abundance in the PRISM?
A. Not present  Not Present
B. Occurs in three or fewer natural areas (locations that are at least ¼ mile apart) with no infested area* >1 acre or containing >100 individuals  Restricted
C. Present in 4–10 natural areas, or with one occupied location >1 acre or containing >100 individuals  Common
D. Present in >10 minimally managed areas  Widespread
U. Unknown  Unknown

Answer: Widespread

Describe distribution:
Documented from 30+ sites on Long Island and Staten Island since 1980.
Sources of information:
Brooklyn Botanic Garden, 2008.

2. What is the likelihood the species will occur (if not yet present) or expand its distribution and abundance (if already present) in the PRISM?

Answer: ***Very likely***

Documentation (e.g.: history of establishment in PRISM, suitability of habitats and climate, distribution models, literature, expert opinions):
- Well established in PRISM.
- Sources of information:
  - Brooklyn Botanic Garden, 2008.

B. INVASIVENESS RANK IN THE PRISM:

Is the species distribution Widespread or Common?

Yes: Go to column A in table below.

No: What is the likelihood of species occurrence or expansion? Answer: 

- Very Likely: Use column A below
- Moderately likely: Use column B below
- Unlikely: Use column C below
- Zero likelihood: Invasive potential Insufficient
- Unknown: Invasive potential Unknown
- Not assessed: Invasive potential not assessed

Assign a PRISM invasiveness rank to the species based on its New York Relative Maximum Score, using the designated column in the table below.
