PRISM: Long Island Invasive Species Management Area

Scientific name: Viburnum sieboldii  USDA Plants Code: VISI
Common names: Siebold viburnum
Native Distribution: Japan
Date Assessed: January 7, 2010
PRISM Assessors: Steve Glenn
PRISM Reviewers: LIISMA SRC
Date Approved: Jan. 20, 2010  Form version date: 13 April 2009

New York Relative Maximum score: 62.50  Date NY assessment approved: Jan. 20, 2010
New York State Invasive Rank: Moderate

SUMMARY OF PRISM RANKING RESULTS:

Distribution: Widespread

Estimated number of infested sites: 13+

PRISM Invasiveness Rank$: Moderate

A. DISTRIBUTION AND ABUNDANCE (KNOWN/POTENTIAL):

1. What is the species distribution and abundance in the PRISM?
   A. Not present  Not Present
   B. Occurs in three or fewer natural areas (locations that are at least ¼ mile apart) with no infested area* >1 acre or containing >100 individuals  Restricted
   C. Present in 4–10 natural areas, or with one occupied location >1 acre or containing >100 individuals  Common
   D. Present in >10 minimally managed areas  Widespread
   U. Unknown  Unknown

Answer: Widespread

Describe distribution:
Documented from 13+ sites on Long Island since 1980.
Sources of information:
Brooklyn Botanic Garden, 2010.

$Not Assessable: not persistent in the PRISM, or not found outside of cultivation.

PRISM
(New York Partnerships for Regional Invasive Species Management)

NON-NATIVE PLANT INVASIVENESS RANKING FORM

2. What is the likelihood the species will occur (if not yet present) or expand its distribution and abundance (if already present) in the PRISM?

Answer: Very likely

Documentation (e.g.: history of establishment in PRISM, suitability of habitats and climate, distribution models, literature, expert opinions):
Well established in PRISM.
Sources of information:
Brooklyn Botanic Garden, 2010.

B. INVASIVENESS RANK IN THE PRISM:

Is the species distribution Widespread or Common?
Yes: Go to column A in table below.
No: What is the likelihood of species occurrence or expansion? Answer:

Very Likely: Use column A below
Moderately likely: Use column B below
Unlikely: Use column C below
Zero likelihood Invasive potential Insignificant
Unknown Invasive potential Unknown
Not assessed Invasive potential not assessed

Assign a PRISM invasiveness rank to the species based on its New York Relative Maximum Score, using the designated column in the table below.
