**Multiflora Rose** *Rosa multiflora*

- Densely spreading perennial shrub.
- Arching canes red to green in color, glabrous (no hairs) with recurved thorns.
- Leaves alternate, pinnately compound with 5 - 11 serrated leaflets (1-1.5in.) long; smooth and dark above, pale with small hairs below.
- Feathery or comb-like margin on its stipules.
- Flowers white to pink in May or June.
- Small bright red hips develop in the summer.
